Introduction

Agro-economic resources and production data concerning the level of agricultural crops and animal products play a pivotal role in the national economic development of the Palestinian Territory.

The Palestinian Central Bureau of Statistics (PCBS) strives to support and develop statistical data systems including an agricultural database given that it constitutes the most significant base for infrastructure required for the developmental process.

In response to the above policy, the PCBS prepared this report based on information and statistical data about the agricultural sector; compiled from the administrative records of some ministries, other PNA institutions, and the PCBS field surveys.

Reference period of data in this report were concurred with Israeli aggression on Palestinian governorates and Palestinian people, which leads to a huge losses, that appeared in the most agricultural, industrial and other sectors.

Objectives

The main objectives of this report are to provide some basic data that are required for putting forward essential plans and policies for promoting and developing the various activities and factors of production, as well as initiating an agricultural data base that supports the developmental process in the agricultural sector, another main objective for this report is to provide data about agricultural water wells, quantity of pumped water, fishermen and their boats, slaughterhouses and hatcheries, prepared eggs for hatching and produced chicks, workers in agricultural sector and their wages, some economic indicators as consumer and producer prices, agricultural establishments and cooperatives and finally agricultural engineers.

Concepts and Definitions

Water well:	A hole that extends from the ground surface down to one or more water-carrying layers (Aquifers).
Consumed water:	An amount of water drawn from groundwater or a source of surface water for agricultural usage such as irrigation, animal farms and other type of usage.
Agricultural Employee:	Anyone who worked in an agricultural activity for at least one hour during the reference week, or who did not work during the reference week, but held a job or owned a business from which they were temporary absent (because of illness, vacation, temporary stoppage, or any other reason). Employees are classified according to employment status as follows:
1. Employer:	A person who operates his or her own enterprise and hires one or more paid employees.
2. Own-account Worker (Self-Employed):	A person who operates his or her own enterprise and hires no employees.
3. Employee:	A person who works for a public or private employer for remuneration in wage, salary, commission, tips, piece-rates or pay in kind.
4. Unpaid Family Member:	A person who works without payment in an enterprise operated by a relation living in the same household.
Labor Force:	The economically active population (Labor Force) who is either employed or unemployed as defined above at the time of the survey.
Daily wage per employee:	Total net wages paid to all employees divided by total workdays. Wages received in different currencies are converted into New Israeli Shekels at the exchange rate during the month of the survey.
Consumer Price Index (CPI):	Is a statistical tool used for measuring changes ((actual price/base price)*100%) in prices of purchased goods and services during different temporal intervals.
Producer's Price:	The producer's price, as defined in SNA93, is the amount paid by the purchaser to the producer for a product or a service produced as an output minus VAT, or a similar deductible tax, invoiced to the purchaser. The producer prices exclude any transport charges invoiced separately by the producer.
Output:	Value of goods and services, including own-account goods, produced during a specific period.
Intermediate	Value of production inputs from both goods and services.

consumption:

Gross value added:	Output minus intermediate consumption.
Compensation of employees:	Wages, salaries and other allowances and remuneration in cash or in kind.
Operating surplus:	Value added- (compensation of employees + taxes on production minus subsidies + depreciation).
Establishment	An enterprise or part of an enterprise in which one group of goods and services is produced (with the possibility of having secondary activities). Agricultural establishments in this report are establishments which produce agricultural products as fish, or they practice agricultural activities as livestock and poultry, and establishments that are related to agricultural sector as production and preservation of meat establishments, manufacture of dairy products establishments and manufacture of prepared animal feed establishments.
North West Bank:	This region includes Jenin, Tulkarm, Nablus and Qalqiliya Governorates, and Tubas and Salfit Districts.
Middle West Bank:	This region includes Ramallah & Al-Bireh, Jericho and Jerusalem Governorates.
South West Bank:	This region includes Bethlehem and Hebron Governorates.
North Gaza Strip:	This region includes North Gaza and Gaza Governorates.
Middle Gaza Strip:	This region includes Deir Al- Balah Governorate.
South Gaza Strip:	This region includes Khan Yunis and Rafah Governorates.
Remaining West Bank:	The West Bank does not include those parts of Jerusalem illegally annexed to Israel in 1967.
Symbols Used in Tables:	(-): Nill. (0): Less than half of the unit. (..): Data not available.

Methodology

Source of Data:

Data Collection for this report relied on surveys that were done by PCBS and other administrative records for some establishments as following:

1. Field surveys conducted by the Palestinian Central Bureau of Statistics:
 - Labor Force Surveys for 1998, 1999, 2000, 2001 and 2002: These surveys provided data on agricultural employment and the average daily wage for workers in agriculture, forest, hunting and fishing.
 - Monthly Consumer Price Index Survey 2002: Monthly Consumer Price Index for main Agricultural plant and animal products for 2002 was prepared and processed.
 - Producer Prices Survey 2002: Agricultural producer price list for the main plant and animal agricultural products for 2002 was prepared and processed.
 - National Accounts 2001: Economic accounts on the agricultural sector for 2001 were utilized in preparing this report.
 - Establishments Census 1997, and its update until 31/12/2002: This census provided data about agricultural establishments that are operating in private sector, 2002
2. Palestinian Water Authority: The Palestinian Water Authority provided data on the wells and water quantities used in agriculture for 2002.
3. Ministry of Agriculture: The Ministry of Agriculture provided data on fisheries, fishermen and fishing boats for 2002.
4. Municipalities (slaughterhouses): The municipalities provided data on slaughterhouses and the number of slaughtered birds and animals for 2002.
5. Hatcheries: They provided data on eggs prepared for hatching and produced chicks for 2002.
6. Ministry of Labor: The Ministry of Labor provided data on the agricultural cooperatives societies for 2002.
7. Agricultural Engineers Association: The number of agricultural engineers and their various fields of specialization were provided by the Agricultural Engineers Association for 2002.

Data were collected by forms, that were prepared for this purpose.

Methodology of Data Collection from Field Surveys:

The adopted source of data for this report could give more detailed information about the methodology of each survey. Some surveys raw data were processed and edited before published as it in this report.

Note: The average exchange rate of NIS for 2002 =0.211 US \$.

Data Quality

Data of the Palestinian Central Bureau of Statistics Surveys

- Data of national accounts for 1994-2000 (Economic Indicators for agricultural sector) are finally justified data, where data for 2001 are primary and subject to change data.
- Establishments that are operating in collection, purification and distribution of water include wells and springs that could be used for non-agricultural purposes.
- The highest production of chicks in 2001 was in October at around 2,315 thousands; approximately 2,265 thousands of which were broiler chicks. Such values were mentioned as 2,315 and 2,265 in the report “Agricultural Statistics: Various Data, 2001”.

Data of Ministries and National Institutions

- Regarding slaughtered animals and poultry, it is worth mentioning that these data represent the number of poultry and animals slaughtered in slaughterhouses only and do not reflect the number of animals slaughtered in commercial outlets, houses or any other places. Moreover, there were some closed or not operating slaughterhouses for the year 2002, so slaughterhouses data represent data that could be collected. Slaughterhouses data were collected through a monthly questionnaire, which makes it of acceptable quality.
- The number of cooperative societies were provided by Ministry of Labor, where the new cooperatives were registered and the un-operational (closed) cooperatives were removed, therefore the number of cooperatives and their activity indicators are considered of high quality.
- The data provided by the Agricultural Engineers Association include the registered engineers only. The available data do not include specialization and place of residence of 195 of registered engineers.
- Fishing activity is restricted in most Gaza Strip governorates, except in North Gaza governorate.
