Acknowledgement

The Palestinian Central Bureau of Statistics (PCBS) extends its deep appreciations to all owners and managers of the hotels who contributed to the success of collecting the survey data and to all workers in the survey for being well dedicated in performing their duties.

The survey of Hotel Activities in the West Bank 2013, has been planned and conducted by a technical team from PCBS and with joint funding by State of Palestine and the Core Funding Group (CFG) for the year 2013 represented by the Representative Office of Norway to the State of Palestine and the Swiss Development and Cooperation Agency (SDC).

Moreover, PCBS very much appreciates the distinctive efforts of the Core Funding Group (CFG) for their valuable contribution to funding the project.

Introduction

Tourism statistics is witnessing a growing interest from the statistical agencies throughout the world due to the fact that the provision of such statistical data would support and develop tourism activities which contribute directly and effectively in promoting the national economy. PCBS has collected statistical data on tourism and hotel activities through a continuous and thorough monthly survey since 1996, in accordance with the recommendations of the World Tourism Organization and European Union. The survey aims to produce a comprehensive database and time series of basic indicators on hotel activity to enable the development and promotion of the tourism sector in the West Bank.

This annual bulletin addresses the main indicators of hotel activities in the West Bank: the number of hotels in operation, the number of rooms and beds, public facilities in the surveyed hotels, the number of employees in hotels, the number of guest nights in the reference period, the number of guests by nationality, and bed and room occupancy rates.

PCBS is pleased to present the results of the survey on hotel activities in the West Bank for the year of 2013 as an important statistical reference. It is hoped that this information will form a step towards the development of a comprehensive tourism program in line with international standards and user needs.

April, 2014

President of PCBS**

Chapter One

Main Findings

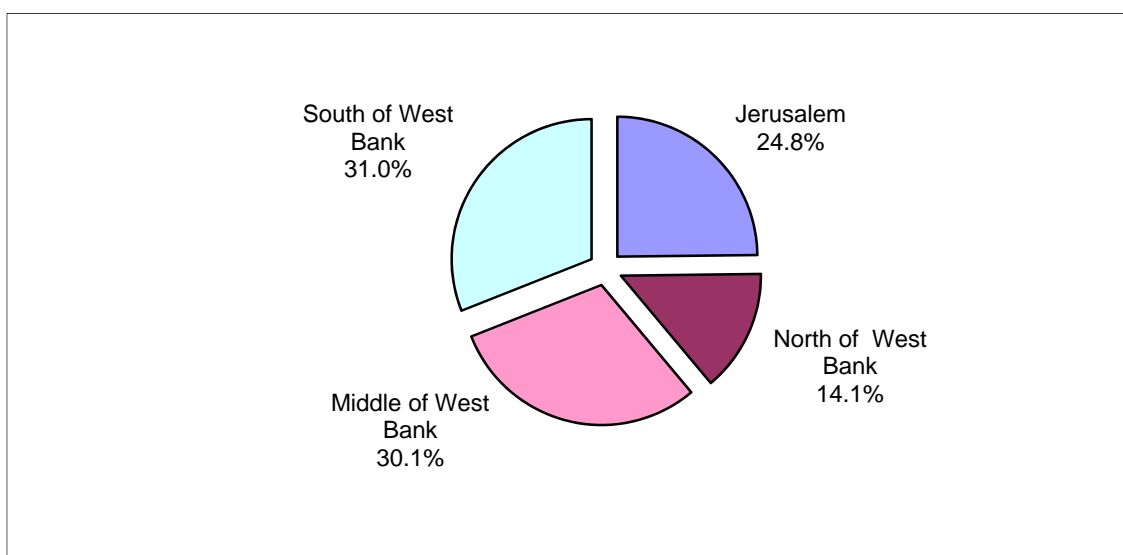

1.1 Distribution of Hotels in 2013

The main findings of the Hotel Activities Survey for 2013 show that 113 of 120 hotels operating in the West Bank responded to the survey. These hotels had 5,890 rooms with a total of 13,458 beds.

The hotels operating in the West Bank were distributed as follows:

- North of West Bank: 16 hotels including 296 rooms with 858 beds.
- Middle of West Bank: 34 hotels including 1,450 rooms with 3,449 beds.
- Jerusalem: 28 hotels including 1,586 rooms with 3,510 beds.
- South of West Bank: 35 hotels including 2,558 rooms with 5,640 beds.

Percentage Distribution of Operating Hotels by Region as of December 2013

1.2 Employment in 2013

There were 2,797 workers employed in hotels as follows:

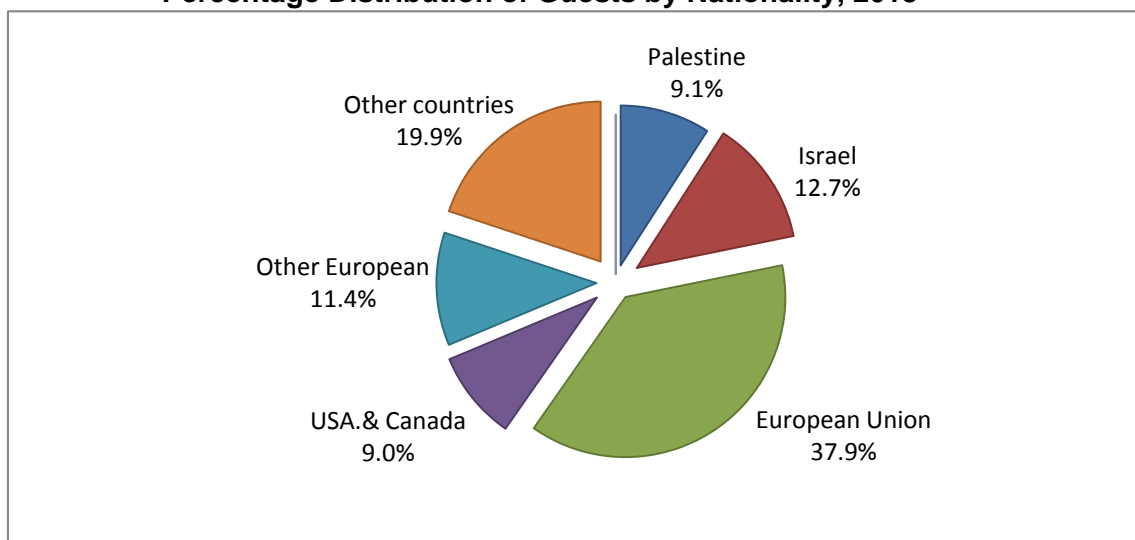

- 544 as administrative staff (382 males and 162 females).
- 2,253 as service workers (1,751 males and 502 females).

1.3 Number of Guests and Guest Nights in 2013

During 2013, the total number of guests in the West Bank hotels was 600,362, of whom 9.1% were Palestinian guests and 37.9% were from European Union countries.

The total number of guest nights in the West Bank hotels during 2013 was 1,467,709, of which 9.6% were by Palestinians, 39.5% by guests from European Union countries and 8.6% were guests from the United States and Canada.

Percentage Distribution of Guests by Nationality, 2013

The number of guests and guest nights increased during 2013 by 4.3% and 9.8% respectively compared with 2012.

Main Indicators of the Hotel Activities, (2009-2013)

Indicator	2009	2010	2011	2012	2013
Number of operating hotels	92	87	91	98	113
Average number of workers	1,514	1,692	2,091	2,449	2,797
Number of guests	451,840	576,159	507,372	575,495	600,362
Number of guest nights	1,041,246	1,283,178	1,245,509	1,336,860	1,467,709
Average occupancy of rooms	1,479.1	1,740.5	1,417.1	1,513.7	1,458.5
Average occupancy of beds	2,852.7	3,515.6	3,412.4	3,652.6	4,021.1
Percentage occupancy of rooms	34.9	37.9	28.4	29.1	24.8
Percentage occupancy of beds	30.7	35.3	31.9	30.7	29.9

Chapter Two

Methodology and Data Quality

2.1 Survey Objectives

By conducting this survey series, we aim to provide a regular flow of data on:

- Number of hotels in operation and the number of rooms and beds in them.
- Rooms and public facilities in the surveyed hotels.
- Number of hotel employees.
- Number of guest nights during the reference period.
- Number of guests by nationality.
- Bed occupancy and room occupancy rates.

2.2 Survey Questionnaire

The questionnaire was designed according to international standards and recommendations. The Higher Council for the Arab Tourist Industry and the Arab Studies Society both contributed to the design of the questionnaire, which aimed to provide data on hotel identification, employees by type of work and sex, the number of rooms and beds, number of guests, their nationality, and room and bed occupancy. The questionnaire is subject to continuous revision and is available on the PCBS website.

2.3 Coverage

The sample frame of the survey was based on the Establishments Census conducted by PCBS in 2012. This sample frame undergoes continuous updating, adding newly-opened hotels and removing closed ones. Hotels which have ceased operations due to maintenance or repairs are not surveyed until they become functional again.

2.4 Field Work

The field workers recruited for the implementation of this survey were selected based on their experience in similar projects. Before being recruited, field workers undergo theoretical and practical training to enable them to carry out their duties properly. Field workers are trained in data collection, how to use the survey manual of concepts and definitions, interviewing and other tasks. Regular rounds of data collection are made to respondents, thus ensuring precision and the accuracy of data.

2.5 Office Work Activities

The completed questionnaires were delivered for office editing. Upon completion of data editing, the questionnaires underwent a process of verification and coding in accordance with coding manuals.

2.6 Tabulation and Data Processing

After being edited, verified and coded, the data were captured electronically using a specially designed data entry program developed in accordance with predetermined formats to fulfill all of the survey's objectives. Prior to initiating data entry, theoretical and practical training sessions are offered to data entry operators. The entered data undergoes electronic editing based on standard editing rules. In addition, random quality checks were undertaken to ensure error free data entry.

After completing data entry, editing and cleaning, statistical tables were produced based on the dissemination plan.

2.7 Data Quality

This includes ensuring relevance, accuracy, timeliness, punctuality, accessibility, clarity, comparability, coherence and completeness.

- **Relevance:** Data are constantly requested by beneficiaries (universities, institutes, colleges and ministries).
- **Accuracy:** Data are audited in accordance with rules and efforts are made to ensure they are free of mistakes.
- **Timeliness and punctuality:** The report is finished at the specified time as scheduled in the statistical calendar.
- **Accessibility and clarity:** Users can obtain data from the PCBS website or user services for detailed data.
- **Comparability:** The results of the survey were compared with quarterly results from 2013 and the results of surveys during previous years.
- **Coherence:** The methodology in this survey was to visit all the enumeration units (hotels) and data were consistent with data collected by tourist police from hotel visitors.
- **Completeness:** The indicators of hotel activity were collected from all hotels in the West Bank during 2013; response to the survey was 95%.

Comparability

Comparisons of the findings of this report with previous quarterly results of the Hotel Activity Survey should show logical and consistent results.

Comparison of the Results of the Annual Bulletin with Quarterly Reports, 2013

Some differences may be apparent in the results of the annual bulletin and those of the quarterly reports due to delays in receiving questionnaires from some hotels. The delayed data are included in the annual bulletin.

Comparison of the Results of the Annual Bulletin with Quarterly Reports, 2013

Quarter	No. of Hotels	Average No. of Rooms	Average No. of Beds	No. of Guests	No. of Guests Nights
Annual bulletin	I	103	5,546	12,696	120,478
	II	109	5,937	13,551	153,183
	III	111	5,993	13,695	135,808
	IV	113	6,084	13,888	190,893
Quarterly reports	I	101	5,508	12,614	120,441
	II	107	5,865	13,472	153,085
	III	111	5,993	13,695	135,808
	IV	113	6,083	13,888	190,893

Response Rates

There were 120 hotels in the West Bank at the end of 2013, of which 113 hotels were in operation. The hotels were distributed according to response as follows:

A total of 113 hotels responded.

There were 6 hotels that had closed temporarily and one hotel was closed permanently.

The non-response rate was 5%.

The response rate was 95%.

Technical Notes

Any changes in the number of hotels, rooms and beds during 2013 were due to the following:

- A number of hotels were undergoing repair or maintenance and were not included in the findings presented in this report.
- Data include all establishments that conduct any type of hotel activity whether categorized or not.
- This publication disseminates indicators related to Jerusalem hotels separately from the Middle of West Bank region since Jerusalem has the largest number of hotels.
- Gaza Strip hotels are not included in this publication due to the inability of field workers there to collect data.

Chapter Three

Concepts and Definitions

This section presents the main concepts and definitions used to derive the main indicators of tourism statistics. These concepts and definitions are based on international recommendations in the field of tourism statistics, and are applied to the rest of the common subjects in the PCBS. The main concepts and definitions mentioned in this report were as follows:

The Hotel:

It is defined as an accommodation establishment providing overnight lodging for the visitors in a room or unit. It should hold a number of persons exceeding that of an average single family. The establishment must be under one management, and provides various facilities and services to visitors.

Operating Hotels:

It is defined as the hotels that included in the sample frame and results, excluding the non operating hotels that are carrying out repairs or maintenance, and the hotels which didn't respond to the survey.

Number of Available Hotel Rooms: (Indicator)

It refers to the number of furnished rooms for the use of guests. Such rooms might be single, double, triple, or quadruple. Rooms involving more than four beds were classified under (others) in the questionnaire. As for the suite, it is usually comprised of one bedroom or more, a living room and private toilet facilities.

Available Beds and Rooms:

It refers to beds and rooms which are ready for use during the reference period. Rooms closed for maintenance or repairs are excluded.

Guests:

It refers to visitors staying in the hotels and using their facilities. Records of new guests are based on the number of visits regardless whether it's the same person or different.

Number of Guest Nights in all Operating Hotels: (Indicator)

Number of beds booked for hotel guests. Such beds are considered as occupied whether they were actually used or not. It is measured by guest night unit.

Number of Occupancy Rooms: (Indicator)

Number of booked and paid rooms. Such rooms are considered occupied whether they were actually used or not.

Average of Hotels (rooms, beds) Occupancy: (Indicator)

It is defined as the total number of occupied (rooms, beds) divided by the number of occupancy days.

Percentage of (rooms, beds) in Hotels Occupancy: (Indicator)

It is defined as the average of (rooms, beds) occupancy divided by available (rooms, beds) multiplied by hundred.

Average Length of Stay in Hotels: (Indicator)

Represents the total of guest nights by citizen ship divided by number of guests of the same nationality.

North of West Bank:

Jenin, Tulkarm, Nablus, Qalqiliya, Salfit and Tubas governorates.

Middle of West Bank:

Ramallah and Al-Bireh, Jericho and Al-Aghwar governorates.

Jerusalem:

Jerusalem governorate.

South of West Bank:

Bethlehem and Hebron governorates.
