Acknowledgment

PCBS appreciates the role of the Chief Justice Council and Palestinian Shariah and Church Courts for providing administrative records data for this report.

Financial and technical support for the Demographic Statistics Program is being provided by the government of Norway through the Norwegian Agency for Development Cooperation (NORAD). PCBS extends special thanks to the Government of Norway and NORAD for this support.

Preface

The Palestinian Central Bureau of Statistics (PCBS) has endeavored since its establishment to undertake essential activities in the field of population statistics. Such activities include a series of reports and surveys, covering education, health, labour force, as well as the 1997 Population, Housing and Establishment Census.

Due to the importance of specialized statistics, PCBS has prepared this second report as part of series of reports on cases of marriage and divorce as recorded in the Palestinian Shariah Courts and Church Courts by Governorate, month, age of bride and groom, age at marriage, age at divorce and other demographic background characteristics.

PCBS has collected data on marriage and divorce since 1996. We hope that this report, for 1998, meets user needs of persons and institutions working in the field. This report provides data on marriage and divorce, an area suffering from wide statistical gaps in the past.

PCBS hopes that these statistics significantly help decision-makers and policy-planners with their work.

Chapter One

Introduction

Vital statistics (on birth, death, marriage and divorce) are important in identifying the demographic situation of a society and in detecting any changes in that society. Also, vital statistics are particularly important for planning purposes.

This report provides comprehensive statistics on marriage and divorce cases by Governorate, age at marriage, month of marriage, median age at marriage, and previous marital status. The report indicates, as well, the prevalence of early marriage in Palestinian society and the rate of divorce for this group, which accordingly evoke an intensive study to render optimum recommendations about these topics.

This report was prepared using 1998 data collected from administrative records of shariah and church courts. Principle indicators were identified and final tables were presented accordingly.

The report consists of three main chapters in addition to lists of tables and figures. The first chapter includes the objective of the study and the introduction. The second chapter presents the main definition and explanations used in this report. Finally, the third chapter demonstrates the main findings.
